The PEA was prepared by Mine Development Associates, an independent engineering firm, in accordance with the definitions in Canadian National Instrument 43-101 ("NI 43-101"). The PEA is considered preliminary in nature. It includes Inferred mineral resources that are considered too speculative to have the economic considerations applied that would enable classification as mineral reserves. There is no certainty that the conclusions within the PEA will be realised. Mineral resources that are not mineral reserves do not have demonstrated economic viability.

The technical information contained in this news release has been reviewed and approved by Red Eagle Mining's Vice President of Exploration, Jeff Toohey P.Eng., who is a Qualified Person as defined under NI 43-101.

### ***About Red Eagle Mining***

Red Eagle Mining is a well-financed gold exploration and development company with an experienced mine-development team. Management is focused on building shareholder value through discovering and developing gold projects with low costs and low technical risks in Colombia, a jurisdiction with prolific historic production but until recently limited modern exploration. Red Eagle Mining is developing the 320 km<sup>2</sup> historic Santa Rosa Gold Project located in the Antioquia Batholith. Development will initially commence with the San Ramon Gold Deposit where a positive Preliminary Economic Assessment supports project advancement. Feasibility and permitting are currently underway.
